1)

The screenshot displays the pgAdmin 4 web interface. On the left, the 'Browser' pane shows a tree structure of databases, including 'PostgreSQL 9.2' and 'PostgreSQL 9.6'. The main pane shows a SQL query in the 'Query Tool' tab. The query is as follows:

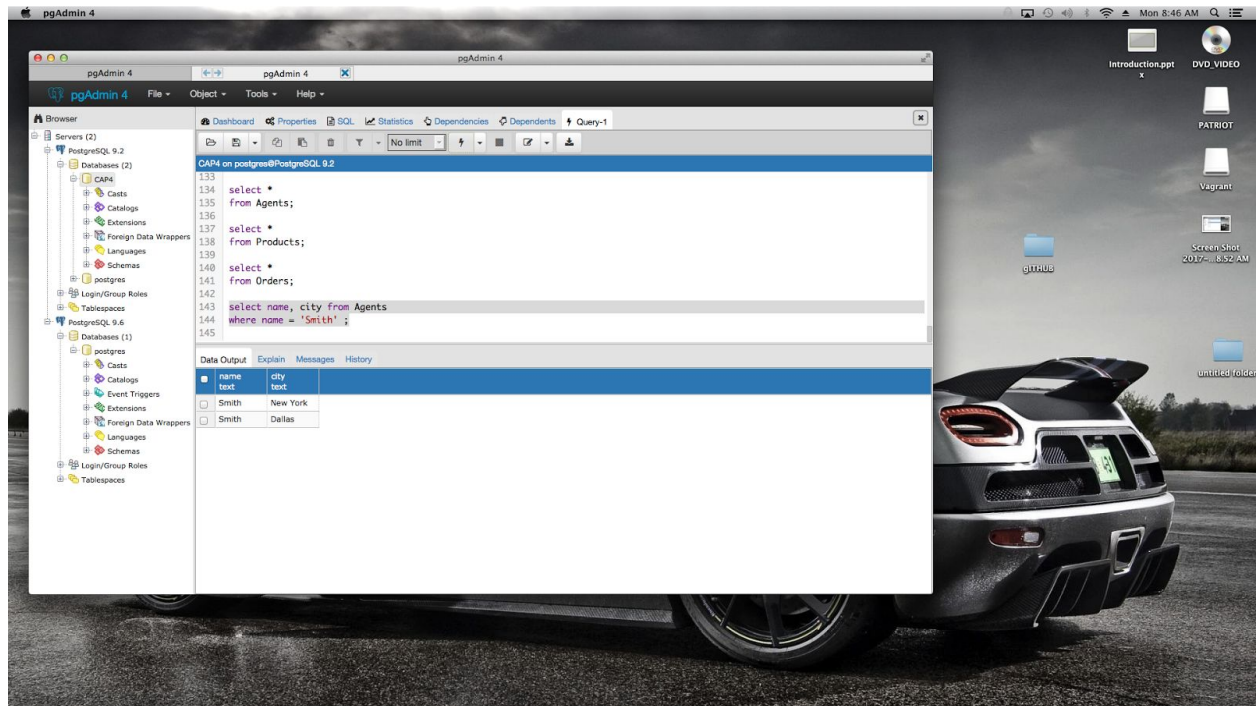

```
AP4 on postgres@PostgreSQL 9.2
-- queries
138 from Products;
139
140 select *
141 from Orders;
142
143 select ordnumber, totalUSD
144 from orders;
145
```

Below the query, the 'Query Output' tab shows the results of the query. The results are displayed in a table with two columns: 'ordnumber' (integer) and 'totalUSD' (numeric). The data is as follows:

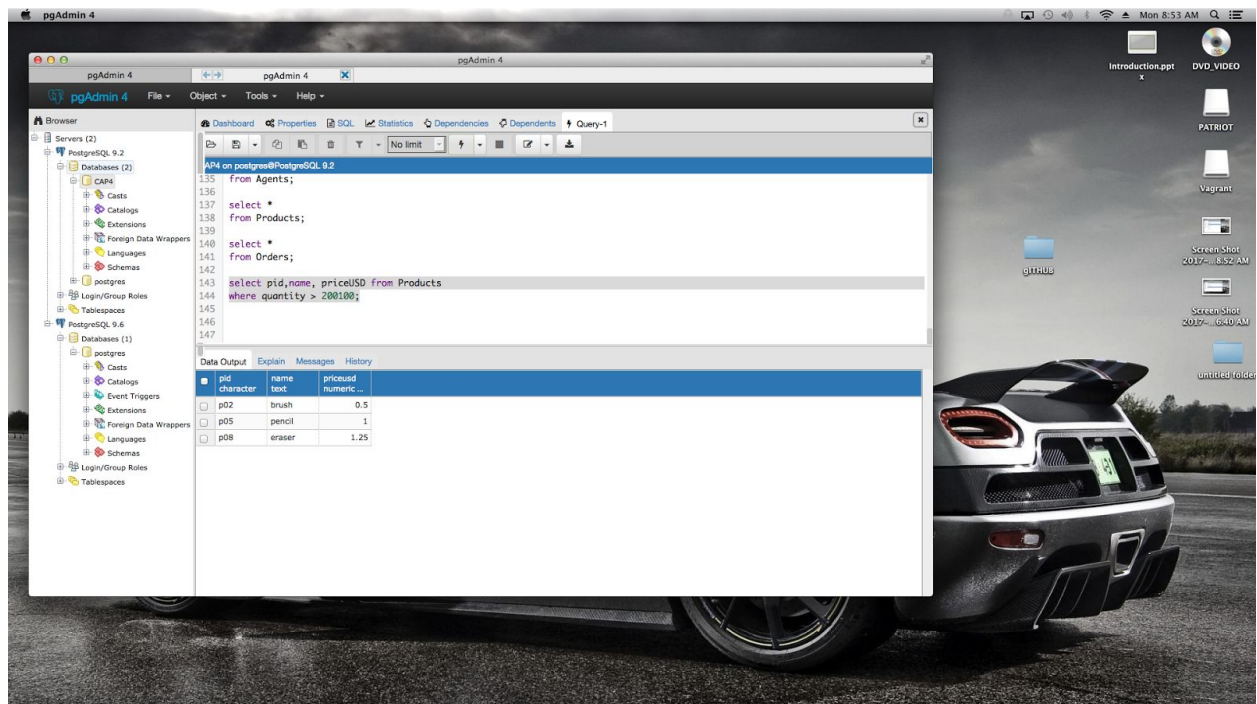

ordnumber	totalUSD
1011	450
1012	880
1015	1104
1016	900
1017	540
1018	540
1019	180
1020	600
1021	460
1022	720
1023	450
1024	400
1025	720
1026	744

The background of the desktop shows a car and a folder named 'git1008'. There is also a notification for 'Updates Available' in the top right corner.
